WASHROOM CLEAN

Safe-acid washroom cleaner

DESCRIPTION

WASHROOM CLEAN is a complete washroom and fixture cleaner that keeps basins, showers, bowls, urinals and washroom surfaces clean in one easy step. High gloss surfaces such as chrome and stainless steel may be polished with a clean, dry cloth, if desired. **WASHROOM CLEAN** is also very effective at removing those difficult stains from ceramic tile floors and grouting. **WASHROOM CLEAN** is a mild, acidic formula and removes soap film, body oils, makeup and mineral deposits without damage.

TIP: Test in an inconspicuous area before using

FEATURES & BENEFITS

ECOLOGO[®] Certified • Safe for all types of fixtures • Non-corrosive
• Phosphate free • Removes scale & calcium deposits

DIRECTIONS

Use a sprayer, hand bucket and sponge or mechanical sprayer device. Simply apply the solution to the surface and wipe clean. For removing hard water deposits and soil accumulations, apply to any washable surface using a sprayer, cleaning cloth, swab or brush. Allow time for the chemical action to begin dissolving the soils. If needed, scrub, using a mild abrasive pad, brush or doodlebug. Use **WASHROOM CLEAN** full strength for those hard to clean areas in your washroom.

Light Soap, Body oil and Soap Film Removal: Use 32 ml per litre of cold water (4 oz/gallon) (1:32).

Removing hard water deposits or heavy soil accumulations: Use 64-128 ml per litre of cold water (8-16 oz/gallon) (1:16 to 1:8). Scrub, using a mild abrasive pad or brush. Repeat procedure as required.

Stainless Steel, Partitions and Other Washroom Surfaces: Use 63 ml per litre of coldwater (8 oz/gallon) (1:16). Clean then polish using a clean, dry towel.

PHYSICAL DATA

Package: 4 x 3.78 L cases
Appearance: liquid
Colour: pink
Foam: low
Odour: floral
pH: 1.0-2.0
